Teacher name: maha kheder

This description provides a summary of the most important course characteristics and - the learning outcomes that the student is required to achieve

1-Educational institution	Al-Zahraa Private University –
2 Saintific dans attraction	for women
2-Scientific department/center	College of Health and Medical
	Technologies – Department of
	Physiotherapy
3-Course name/code	" Medical microbiology
4-Available attendance forms	Official studying hours
4-Semester/year	"First stage of the first
	course"
5-Number of study hours (total)	hours48
6-Date this description was prepared	2024/3/12/

# Course objectives

#### 1.General:

Knowledge of microorganisms that cause infections, whether bacterial, viral, parasitic, or fungal, is crucial for healthcare professionals to effectively manage such cases. Understanding these microorganisms helps in diagnosing and treating infections, as well as implementing preventive measures. Additionally, it enables physical therapists to tailor treatment plans to address any complications or limitations caused by these .infections in the body

### 2. Special:

Knowing the types of causes that cause injuries to the body

- .Genetic factors and chromosomal changes
- .The body's defense mechanism against pathogens

Some pathogens and how to prevent them

10-Course outcomes and teaching, learning and evaluation methods

A- Cognitive objectives

Clarifying basic concepts in microbiology - And understanding the components of the microenvironment

.B - The skills objectives of the course

The student can use a microscope Growing microorganisms on different cultural media Differentiate between different types of microorganisms

### C-Teaching and learning methods

\_

There is a group of printed lectures where the scientific material is discussed and

important notes are made

Additional clarifications

Evaluation methods

Participation in the classroom-

Evaluating activities within scientific laboratories  $\!-\!2$ 

### C- Emotional and value goals

Developing the student's ability to work by completing assignments and submitting them on time

Developing the student's ability to dialogue, research and discuss

#### Teaching and learning methods

Conducting the lecture theoretically with the application of clinical and practical tests

Conducting some daily tests and assigning students to weekly research sessions

Allocate a percentage of the grade to daily assignments and tests

#### **Evaluation methods**

Evaluating students' active participation during the lesson

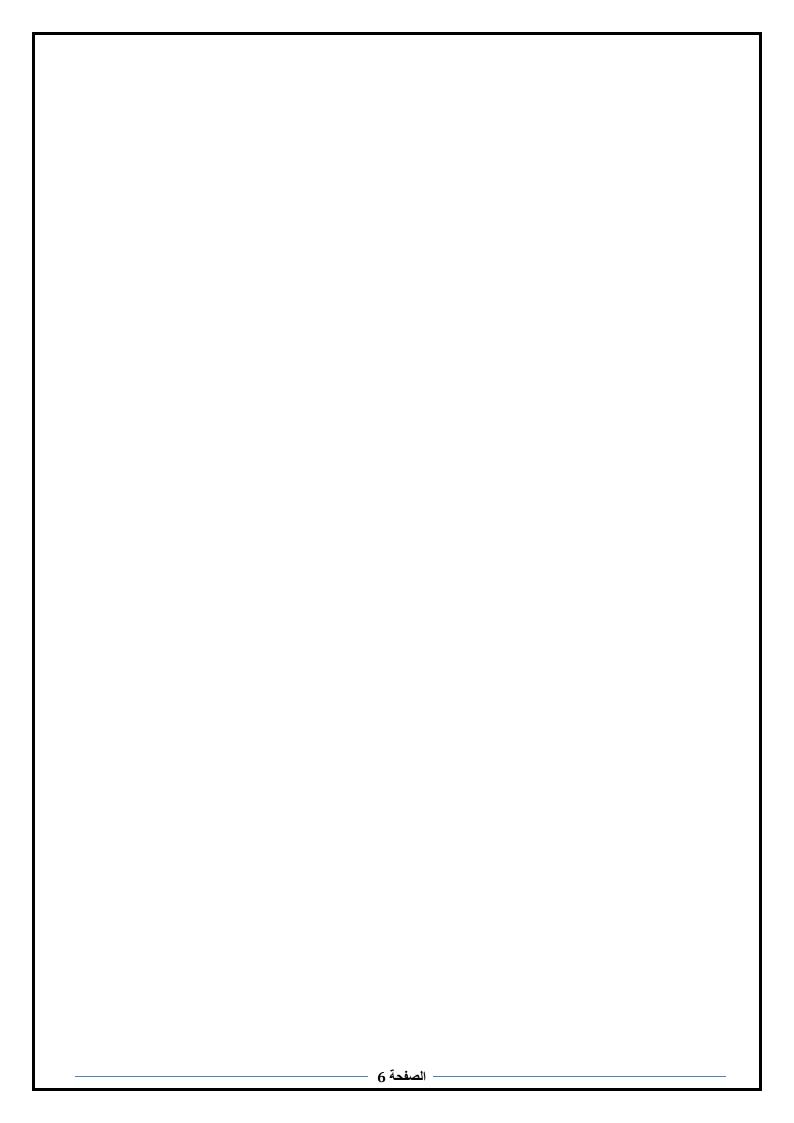

Commitment to the lecture date and not being absent -

Commitment to submitting assignments and research-

# Course objectives

## Course objectives

:Public.1

The functions of the body systems of a living organism, trying to explain the physical and chemical factors responsible for the origin and formation of the continuity of life. Since the human being is a living organism, the student must understand the function ...and work of each part of the body in different situations in order for life to continue

## 2. Special:

:

- 1 The cell, its components and function.
- 2 The muscular and nervous system and how it works.
- 3 The function of the cardiovascular and respiratory systems and the relationship between them.
- 4 The urinary system and the regulation of body fluids, as well as the digestive system and its relationship to temperature regulation and thus the work of the endocrine glands and their role in regulating the activities of all other organs. Thus, the student will be able to know the difference between normal work and functional disorder in pathological cases, which qualifies him to understand the special medical qualification of each organ or system.

#### 10-Course outcomes and teaching, learning and evaluation methods

#### A- Cognitive objectives

Clarifying the basic concepts in physiology --Knowledge and understanding of surrounding natural phenomena and their interpretation

- .B The skills objectives of the course
- Skills of knowledge and remembering
- The ability to think about solving a specific problem 2
- -Writing scientific reports

Analytical skills--

## C-Teaching and learning methods

There is a group of printed lectures where the scientific material is discussed and important notes are made

Additional clarifications

#### Evaluation methods

-Participation in the classroom

Evaluating activities within scientific laboratories -2

#### Emotional and value goals- C

Developing the student's ability to work by completing assignments and submitting them on time

Developing the student's ability to dialogue, research and discuss

### Teaching and learning methods

Conducting the lecture theoretically with the application of clinical and practical tests

Conducting some daily tests and assigning students to weekly research sessions

Allocate a percentage of the grade to daily assignments and tests

#### Evaluation methods

Evaluating students' active participation during the lesson

Commitment to the lecture date and not being absent -

Commitment to submitting assignments and research-

### D. Doaa Essam Hadi.

Course name: Clinical Biochemistry

This description provides a summary of the most important course characteristics and -the learning outcomes that the student is required to achieve

1-Educational institution	Al-Zahraa Private University -
	for women
2-Scientific department/center	College of Health and Medical
	Technologies – Department of
	Physiotherapy
3-Course name/code	Clinical Biochemistry
4-Available attendance forms	Official studying hours
1 Transie attendance forms	Cinetal stadying nouls
4-Semester/year	"First stage of the first
	course"
5-Number of study hours (total)	hours48
6-Date this description was prepared	2024/3/12/

# Course objectives

### Course objectives

Studying the basic concepts of vital interactions within the body and explaining t relationship to the field of physical therapy

## 2. Special:

An introduction to the biochemistry related to health and disease that forms the basis

of modern medical practice with an emphasis on the molecular level Study the molecular structure of the basic components in the human body such as

protein, carbohydrates, and fats. Explaining the importance of the balance between these components and their relationship to various diseases such as obesity, thinness,

and endocrine disorders

.Studying trace types of vitamins and explaining their role in health and disease

Describe the main paths of biosynthesis processes, the steps involved in these paths,

and their enzymatic regulation

Studying the imbalance that occurs in the main metabolic pathways and its relationship to atherosclerosis, strokes, and diabetes

.

### 10-Course outcomes and teaching, learning and evaluation methods

### A- Cognitive objectives

Identify the molecular structure of the basic components in the human body and know the metabolic pathways

The skills objectives of the course- B.

- Skills of knowledge and remembering
- The ability to think about solving a specific problem -
- -Writing scientific reports

Analytical skills--

## C-Teaching and learning methods

There is a group of printed lectures where the scientific material is discussed and important notes are made

Additional clarifications

Evaluation methods

Participation in the classroom-

Evaluating activities within scientific laboratories

C-Emotional and value goals -

Developing the student's ability to work by completing assignments and submitting them on time

Developing the student's ability to dialogue, research and discuss

### Teaching and learning methods

Conducting the lecture theoretically with the application

Conducting some daily tests and assigning students to weekly research sessions

#### Evaluation methods

Evaluating students' active participation during the lesson

Commitment to the lecture date and not being absent -

Commitment to submitting assignments and research-

# Course development plan

Using modern methods	
<u> </u>	

Teacher name: DR. Nuhad Al-Rubaye

This course description provides a summary of the most important course characteristics and the learning outcomes that the student is expected to achieve, demonstrating whether he or she has made the most of the learning opportunities available. It must be linked to the program description-

1-Educational institution	Al-Zahraa Private University -
	for women
2-Scientific department/center	College of Health and Medical
	Technologies – Department of
	Physiotherapy
3-Course name/code	Introduction to physical "
	therapy
4-Available attendance forms	Official studying hours
4-Semester/year	"First stage/second course
5-Number of study hours (total)	Approximately 90 hours
6-Date this description was prepared	2024/3/12/

# Course objectives

General: Introducing students to the profession of physical therapy and directing .1 them to it

#### :Private.2

.The importance of applying physical therapy to improve human health

Describe the basic elements of the physical therapy process and their application to .pathological conditions			
.Define and use basic terminology in physical therapy			
.Knowledge of daily vital activities			
.Respect patients' privacy			
10-Course outcomes and teaching, learning and evaluation methods			
A-			
Cognitive objectives Learn about the profession of physical therapy The purpose of applying physical therapy to various pathological conditions			
.B - The skills objectives of the course - Ability to focus and analyze .The ability to think about solving a specific problem			
C-Teaching and learning methods  There is a group of printed lectures where the scientific material is discussed and important notes are made  Additional clarifications			

الصفحة 2

Evaluation methods

Participation in the classroom-

Evaluating activities within scientific laboratories-2

#### C- Emotional and value goals

Developing the student's ability to work by completing assignments and submitting them on time

Developing the student's ability to dialogue, research and discuss

Developing the student's ability to choose the appropriate device for medical conditions

### Teaching and learning methods

Conducting the lecture theoretically with the application of clinical and practical tests

Conducting some daily tests and assigning students to weekly research sessions

Allocate a percentage of the grade to daily assignments and tests

#### Evaluation methods

Evaluating students' active participation during the lesson

Commitment to the lecture date and not being absent -

Commitment to submitting assignments and research-

The	Hours	Required	Name of the	Teaching	Evaluation
week	nours	learning outcomes	unit/topic	method	method
1 <sup>st</sup>	6		History of physiotherapy.	Theoretical+ practical	Quiz+ Discussion
2 <sup>nd</sup>	6		Terminology in physiotherapy.	Theoretical+ practical	Quiz+ Discussion
3 <sup>rd</sup>	6		Definition and epidemiology of disability, impairment and handicap. Process of disability.	Theoretical+ practical	Quiz+ Discussion
4 <sup>th</sup>	6		The concept of team approach, members of the interdisciplinary team. The responsibilities and functions of the physiotherapist.	Theoretical+ practical	Quiz+ Discussion
5 <sup>th</sup>	6		The role of the physiotherapist in the current changes in health care.	Theoretical+ practical	Quiz+ Discussion
6 <sup>th</sup>	6		Define levels of care within the delivery system (acute, subacute, rehab, skilled nursing, home care, etc.).	Theoretical+ practical	Quiz+ Discussion
7 <sup>th</sup>	6		Disability prevention and principles of physiotherapy.	Theoretical+ practical	Quiz+ Discussion
8 <sup>th</sup>	6		Understanding of the organization of physical therapy services( prevention, treatment and restoration).	Theoretical+ practical	Quiz+ Discussion
9 <sup>th</sup>	6		The role of both non-verbal and verbal communication in physiotherapy.Brief outlines of psychosocial aspects of physiotherapy.	Theoretical+ practical	Quiz+ Discussion
10 <sup>th</sup>	6		The importance of patient and family education and the impact of patient and family education on physiotherapy outcomes.	Theoretical+ practical	Quiz+ Discussion
11 <sup>th</sup>	6		Activities of daily living, functional assessment, training for functional independence.	Theoretical+ practical	Quiz+ Discussion

12 <sup>th</sup>	6	<b>Introduction to</b>	Theoretical+	Quiz+
		occupational therapy.	practical	Discussion
13 <sup>th</sup>	6	The physiology and	Theoretical+	Quiz+
		consequences of aging.	practical	Discussion
14 <sup>th</sup>	6	Patient privacy.	Theoretical+	Quiz+
			practical	Discussion
15 <sup>th</sup>	6	Revision.	Theoretical+	Review/
			practical	

	practical
